STI/HIV screening

Your body can suffer from many diseases. Some are visible (pimples, fever, redness...) and others are not (you may not even know that you are sick). That's why your body needs to be taken care of, looked at and checked by health professionals.

It is important to be tested. Screening is looking to see if you have a disease or not.

It can be done with a blood test, a smear (to find cervical cancer for example), a drop of blood on the finger, mammogram (photo of the breasts to find a breast cancer) etc... Many diseases are easily treated especially if they are detected as early as possible!

CEGIDD :

- Medical testing for : HIV, Hepatitis A/B/C, chlamydia, syphilis
- Sexually Transmitted Infection care (such as PrEP) + vaccinations
- Make an **appointment**
- **by phone** (they receive a lot of calls, do not hesitate to call several times)
